Additional work includes bridge widening along I-95 at several locations, painting of 17 bridges within project limits, I-95/SR 84 interchange modifications, Integrated Intelligent Transportation System (ITS) Installation, including traffic monitoring devices, detectors, and dynamic message signs to optimize traffic operations, tolling/gantry construction, ramp signalization implementation at the interchanges, lighting, signage, and drainage installation and construction of shoulder-mounted sound walls and retaining walls.

Project personnel will be on hand to discuss the scope of work, construction schedule, and address questions and comments one-on-one. The Open House will have an informal format; no formal presentation will be made. Guests may arrive at any time between 5 p.m. and 7 p.m.
