

FACT SHEET

Project Overview

In a continued effort to enhance mobility throughout the state, the Florida Department of Transportation (FDOT) has completed portions of the northbound and southbound managed lanes project along I-95 from Cypress Creek Road to Glades Road. One lane was added to I-95 and the High Occupancy Vehicle (HOV) lane was converted to create two managed lanes in each direction.

Starting November 13, the newly implemented managed lanes will offer additional travel options for drivers on the I-95 corridor from Cypress Creek Road to Glades Road. The number of general use lanes available to travelers will remain the same. Entrances for the I-95 northbound managed lanes are located north of Cypress Creek Road and north of Hillsboro Boulevard, and exits are located south of SW 10th Street and south of Glades Road. Entrances for the I-95 southbound managed lanes are located south of Glades Road and south of SW 10th Street and exits are located north of Hillsboro Boulevard and north of Cypress Creek Road. Construction of the 95 Express Phase 3 project commenced in Broward County in August 2016 and the entire Phase 3 system from Hollywood Boulevard in Broward County to Linton Boulevard in Palm Beach County is anticipated to be operational by 2024.

Project Key Components

- Managed lanes dedicated entrance and exit points
- Ramp Signaling to maintain consistent traffic flow and reduce crashes
- Integrated ITS (Intelligent Transportation System)/Tolling systems
- Sound barrier walls along residential neighborhoods

Project Benefits

This project expands the managed lanes, enhances safety, optimizes traffic flow, and provides more reliable travel times for longer, regional trips. This project adds additional capacity to the existing managed lanes system while relieving congestion.

FACT SHEET

Managed Lanes Use

Customers will be able to access the managed lanes at designated entrance locations only. Destinations and the corresponding managed lanes toll will be posted on electronic signs in advance of the entrance, giving motorists time to choose whether they would like to use the managed lanes. Upon entering the managed lanes, motorists will pay the toll rate displayed on the sign until reaching the next decision point. Motorists will never pay a higher toll amount than the rate displayed on the sign. If the toll decreases after entering the managed lanes, motorists will pay the lower amount until they reach the next decision point.

Managed Lanes Entry & Exit Points

Northbound Entrance Ramps

- North of Cypress Creek Road
- North of Hillsboro Boulevard

Southbound Entrance Ramps

- South of Glades Road
- South of SW 10th Street

Northbound Exit Ramps

- South of SW 10th Street
- South of Glades Road

Southbound Exit Ramps

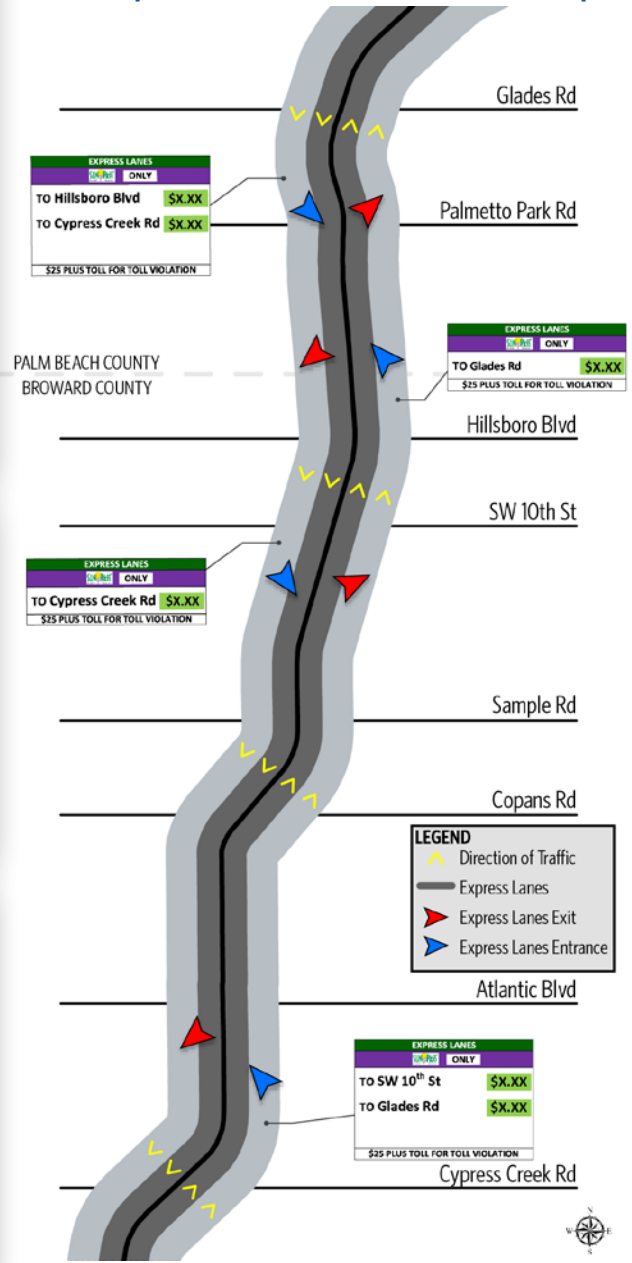

- North of Hillsboro Boulevard
- North of Cypress Creek Road

Managed Lanes Tolls

The newly implemented tolls in the managed lanes will be collected electronically using a SunPass or any other Florida-accepted transponder. Customers must have an active account with the transponder properly affixed to the windshield.

For more information regarding SunPass, please visit www.sunpass.com or call SunPass Customer Service Center at 1-888-865-5352.
